

## INNOVADERM RESEARCH INC. JOINS TRIALSTAT'S CROFIRST PROGRAM

*Montreal-based Contract Research Organization (CRO) Deploys  
ClinicalAnalytics 4.0 for its Clinical Trials*

**June 24, 2008, OTTAWA, ON and Montreal, PQ** – TrialStat Corporation, the industry's first clinical data solutions on demand company, today added Innovaderm Research Inc., a Canadian-based Clinical Research Organization specializing in dermatology, to the growing list of Contract Research Organization's joining TrialStat's CROFirst Program. The CRO channel program provides discounts to promote mutually beneficial joint business development and marketing initiatives between TrialStat and its CRO partners. As a member of CROFirst, Innovaderm can utilize discounts on its CA 4.0 licenses to grow its bottom line and expand its business in partnership with TrialStat in North America.

"We selected TrialStat's CA 4.0 because of its ability to facilitate data collection, data monitoring, and data management in a CRF 21 part 11 environment," said **Dr. Robert Bissonnette, President and founder, Innovaderm Research Inc.** "CA 4.0 meets our needs with its full or basic service option. CA 4.0's flexibility, functionality and speed will certainly contribute to our long-term business growth."

"We are excited about Innovaderm's participation in our CROFirst program," said **Jonathan Barker, President and CEO, TrialStat.** "This joint partnership will enable both TrialStat and Innovaderm to more effectively collaborate on activities that promote the benefits of CA 4.0 in the field of dermatological research."

### **ABOUT TRIALSTAT**

TrialStat Corporation provides innovative clinical data solutions on demand that optimize the collection and management of research to enable customers to accelerate the commercialization of new life science products. CA 4.0 is a robust and scalable Web-based EDC on demand platform used by leading biopharma organizations. CA 4.0® automates systematic reviews using real-time collaboration and management tools, while ESRNexus™ ([www.esrnexus.com](http://www.esrnexus.com)) is the most comprehensive and free Web-based search engine for evidence-based reference literature. More information about TrialStat is available at [www.trialstat.com](http://www.trialstat.com).

### **ABOUT INNOVADERM**

Innovaderm Research Inc. is a clinical research company that has been active since 1999. Specializing in phase I clinical studies, pilot studies and the proof of concept studies in dermatology, Innovaderm has quickly built a strong reputation for the quality of its clinical research and the care offered to its patients. Innovaderm's complete range of services include study design, protocol development, volunteer recruitment, execution of the clinical trial and writing of the final report. Innovaderm is internationally renowned for its numerous research studies on psoriasis, acne and atopic dermatitis, as well as, for studies involving biological molecules and photodynamic therapies (PDT).
